THE KENNETH

Kosciuszko Facade

Description

When you open the front door to the Kenneth 241 you will automatically feel like home! This four bedroom home combines the living, dining and kitchen area that extends to the outdoors via a side alfresco, making this ideal for indoor and outdoor living. If you like the privacy of your master bedroom not facing the street, the Kenneth 241 is certainly worth consideration. The master suite, ensuite and walk in robe is central in the home. The three other bedrooms are in their own separate area, which is located off the rumpus room.
